## **Mercantile Law, 8th Edition**

Rate laws, order of chemical reactions 1st order, 2nd order, pseudo 1st order, 0th order, and fractional order various methods for determination of order of chemical reactions such as differential method, integration method, and isolation method; Rate constants, factors determining reaction rates in solution, collision and transitional theory, application of collision theory on chemical reactions in solutions, reactions between ions in solutions; Composite reactions, steady state and rate determining steps in various composite organic and inorganic reactions such as reactions between hydrogen and halides, decomposition reactions of ozone, acetaldehyde, and ethane, inhibition mechanism, polymerization reactions; Photochemical reactions and mechanism, flash photolysis, photosensitization process, generation of reactive oxygen singlet through photosensitization.

## **Torreys Narrative**

The parallel between anarchist and socialist and later syndicalist grounds for making antimilitarist propaganda central to their larger goals is clear from the language of

early anarchist propaganda.
